

Muhammad Aqib Yousuf

MONITORING, EVALUATION & RESEARCH PROFESSIONAL

aqibyousof098@gmail.com · +92 327 1223399 · Karachi, Pakistan

PROFESSIONAL SUMMARY

Research and Monitoring and Evaluation professional with 3+ years of cross-sector experience spanning international development, B2B SaaS, and social sector research. Currently serving as a Consultant with the World Bank Group on KWSSIP, leading a longitudinal impact evaluation of piped water infrastructure across informal settlements in Karachi, including survey instrument design, KoboToolbox-based field data collection, field staff training, and household-level statistical analysis. Prior experience includes user research and product analytics at DigitalOcean, strategic design research for a GAIN food distribution program at Proportion Global, and peer-reviewed WASH research at Habib University. Skilled in mixed-methods research design, quantitative modeling (R, Python, Stata, SQL), data visualization, stakeholder engagement, and translating complex findings into evidence-based recommendations for program and senior leadership teams. Deep familiarity with informal settlement communities in Karachi and the socio-economic dynamics of underserved urban populations.

WORK EXPERIENCE

World Bank Group — Consultant

Dec 2025 – Jun 2026 · Karachi, Pakistan

Consultant, Karachi Water and Sewerage Services Improvement Project (KWSSIP)

- Designed and led a longitudinal impact evaluation of piped water infrastructure across 3 informal settlements in Karachi, developing the results framework, indicators, and data collection protocols from the ground up.
- Developed baseline survey instruments measuring direct and indirect costs of water access, household expenditure patterns, and socio-economic indicators aligned to program M&E objectives.
- Trained and supervised field staff in KoboToolbox for survey enumeration, ensuring data quality, consent compliance, and protocol adherence across all enumeration sites.
- Analyzed household-level water access and expenditure data using R, producing structured analytical reports with findings and actionable recommendations.

DigitalOcean — User Researcher, Cloudways

May 2023 – Sep 2025 · Karachi, Pakistan

- Led end-to-end mixed-methods research across a \$100M+ ARR B2B SaaS platform, combining user interviews, usability testing, large-scale surveys, and behavioral analytics to generate insights that informed product, pricing, and go-to-market decisions.
- Built logistic regression churn-prediction models in R using SQL-extracted behavioral data and Mixpanel; applied cohort analysis to identify at-risk segments and drove targeted retention interventions improving retention by 10% over 3 quarters.
- Designed and analyzed A/B experiments and pricing studies using Gabor-Granger methodology; AI Copilot research drove a 10% adoption lift based directly on research-led recommendations.
- Produced an end-to-end service blueprint of the Cloudways customer journey, mapping critical drop-off points and pain areas that directly shaped product roadmap and go-to-market strategy.
- Built PowerBI dashboards giving Product, Marketing, Strategy, and Revenue teams self-service access to CX and behavioral insights aligned to quarterly OKRs.

Proportion Global — Design Researcher

Nov 2024 – Apr 2025 · Karachi, Pakistan

Research lead for Global Alliance for Improved Nutrition (GAIN) food distribution program

- Led primary qualitative research across 2 cities (45+ stakeholder interviews, 6 focus groups), synthesizing findings into opportunity maps and service blueprints adopted as official program success metrics.
- Facilitated week-long strategic design sprints with multidisciplinary teams, mentoring junior researchers and ensuring stakeholder alignment on program strategy and implementation priorities.

Karachi Water Project, Principal Investigator: Dr. Hassaan Furqan Khan

- Conducted statistical analysis in R and Stata for two city-wide water management studies; produced policy briefs and research publications acknowledged in 3 peer-reviewed journal publications.
- Designed survey instruments, sampling frames, and field team protocols; ensured GDPR-style consent and data governance compliance across all data collection activities.

- Developed a research framework and comprehensive database on the deaf community in Pakistan, compiling data on education access, employment patterns, and service delivery gaps for persons with disabilities.
- Synthesized findings into an evidence base used by ConnectHear for grant applications, providing a data-driven picture of service needs and gaps in deaf community support.

EDUCATION

SKILLS & TOOLS

Research & M&E	Impact evaluation design, longitudinal study design, baseline and endline studies, mixed-methods research, survey instrument development, qualitative research (interviews, focus groups), field staff training, data quality assurance, needs assessments, programme M&E frameworks, policy brief writing
Quantitative & Analytics	R, Python, SQL, Stata — statistical analysis, regression modeling, cohort analysis, churn modeling, A/B testing, significance testing, behavioral analytics, data cleaning and processing
Data Visualization	PowerBI, Tableau, Mixpanel — dashboard development, data storytelling, executive reporting, stakeholder presentations
Field & Research Tools	KoboToolbox, ODK, Qualtrics, Maze, Dovetail, Respondent.io, Figma, Miro, Jira, AI-assisted research (Copilot, Claude)
